Manual Import Bank Transactions

1. **Set up the Import.**
   Tell the program where the rows and columns are in the Bank's exported Excel or csv.

   Open Excel, which will be in PC Downloads, examples:

   Example 1

BBVA

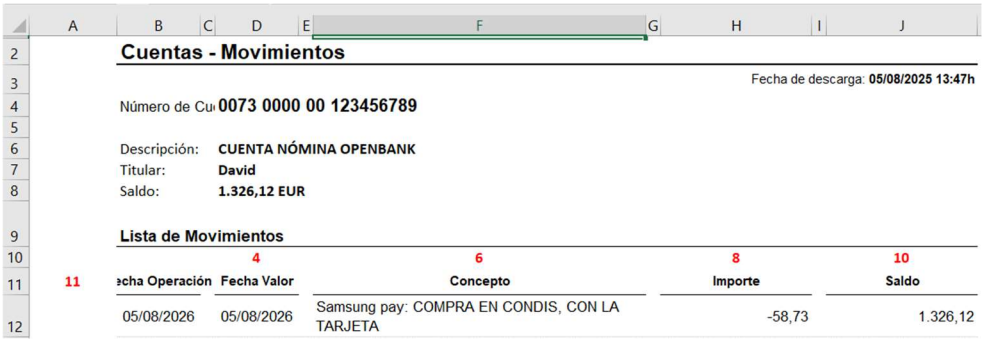

Últimos movimientos

Fecha de generación del informe: 01/01/2000

	3	4		6		8		10
5	F. valor	Fecha	Concepto	Movimiento	Importe	Divisa	Disponible	Divisa	Observaciones
	01/01/2000	01/01/2000	Cargo mensual de tarjeta	A11111111111111	-100	EUR	231,67	EUR	N 11111 VISA

   We need:
   The Row of the headers, in our example 5.
   The Date column, in the C is therefore 3.
   The Description column we want to see, D or J, can be 4 or 10.
   The Amount column, in the F is therefore 6.
   The column of the Balance in the Bank as of the Date of the exported statement, in the H is **8**.
   Final format: (5,3,4,6,8) o (5,3,10,6,8)

   Example 2

Cuentas - Movimientos

Fecha de descarga: **05/08/2025 13:47h**

Número de Cu **0073 0000 00 123456789**

Descripción: **CUENTA NÓMINA OPENBANK**
Titular: **David**
Saldo: **1.326,12 EUR**

Lista de Movimientos

		4	6	8	10
11	11	echa Operación	Fecha Valor	Concepto	Importe	Saldo
		05/08/2026	05/08/2026	Samsung pay: COMPRA EN CONDIS, CON LA TARJETA	-58,73	1.326,12

   We need:
   The Row of the headers, in our example 11.
   The Date column, in the D is therefore 4.
   The Description or Concept column, the F, the **6**.
   The Amount column, in the H, is therefore 8.
   The column of the Balance in the Bank as of the Date of the exported statement, in the J is **10**.
   Final format: (11,4,6,8,10)

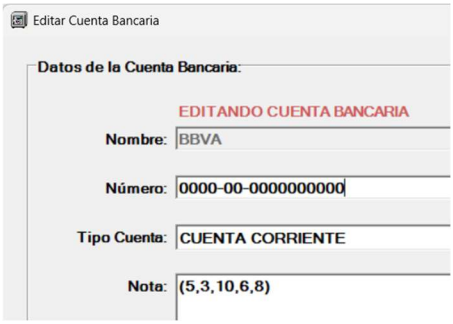

Example 3 (No Balance Column)

	A	B	C	D	E	F
2					Lista de movim	
3		BBVA			Data de generaci	
4						
5		Data	Tarjeta VISA	Concepte	Import	Divisa
6		05/08/2026	10101010101	Recibo mes anterior	466,67	€
7		04/08/2026	10101010101	Bon preu, s.a.u.	-17,63	€
8		01/08/2026	10101010101	Paypal *netflix	-8,99	€

We need:
The Row of the headers, in our example 5.
The Date column, in the B is therefore 2.
The Description or Concept column, D, 4.
The Amount column, in the E is therefore 5.
Since there is NO Balance column on the statement, it is left empty.
Final format: (5,2,4,5,)

You have to open the **ContaHogar 3.0 Premium** Bank Accounts and modify the Bank Accounts you want to use to import Movements of the Bank to Notes, leaving written in Note: the format we have created, such as the examples above.
Example, in parentheses: (5,3,10,6,8)

In the event that the Bank Balance does not exist in the Excel or csv, as it may be in Credit Card listings, leave no number at the end, e.g.: (5,3,10,6,)

2. **Start to Import Bank Transactions.**
   Enter Accounting Entries of ContaHogar 3.0 Premium.
   - Select **the Bank account to import** in Accounts and press the Filter button, this way you have the Total Balance in the Notes grid, to see if matches the one that the Bank's statement tells you.
   - Press the Button  found in the Edit block, Windows Explorer will open under Downloads and you have to select the Excel that the Bank has sent you.

You confirm the file with **Yes** or to abort the import with **No**.

- The Bank Entry *window will open* in a mode that
  you can access at the same time the Notes grid in the window below, for a better location of dates, concepts or Amounts.

In this window, choose the Concept of the data sent to us by the Bank.
If you want to vary your description, it's the same as when you manually enter the notes, type in Search Description: if it exists, with the Tab jump to the drop-down and press Enter, that the description does not exist in the drop-down, press Enter and it will ask you if you add it to the descriptions.

At all times we see in **Total Balance:** the amount of the balance in the Bank and how you have filtered the Account by the Bank you are importing,
when **Total Balance**: matches the Total of Entries, it means that you have everything updated.

- Press **OK and Other**, to save the note and move to the next row of the bank statement.

- Press **Skip Note**, if you don't want to save or you already have it in Notes.

- Press **Cancel**, to finish before it reaches the last row of the statement.
